## Migration Study on Fall Term 2002 Cohort

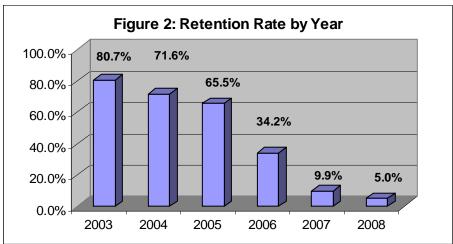

This is a migration study on the cohort of first time, full time (credit hours greater than or equal to 12), and degree seeking undergraduate students enrolled in the Fall Term of 2002. The study provides detailed information on enrollment, graduation, retention, attrition and migration of the cohort class over a 1-year to 6-year time span. With this study, each college can track the migration patterns of their students and determine the graduation, retention, and attrition rates of students in their college cohort from 2002-2008.

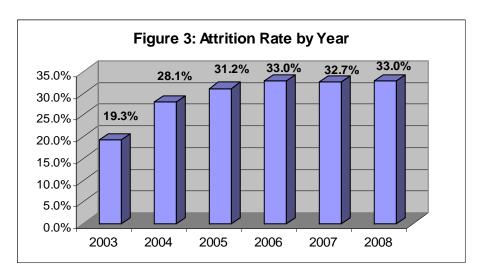

There were 2,998 students in the Fall Term 2002 cohort class, enrolled in 10 colleges/programs at the university. Table 1 contains the student graduation, retention, and attrition numbers and percentages for 2006 (4-year), 2007 (5-year) and 2008 (6-year). The data showed that in Fall Term 2007, there were 296 students from the cohort continuing their study in the university. Figures 1, 2, and 3 depict the graduation rate, retention rate, and attrition rate by year for the Fall Term 2002 cohort class. The six-year graduation rate for Fall Term 2002 cohort was 60.8%. The first year retention rate for the Fall Term 2002 cohort was 80.7%. One year later, 28.2% of the students in the cohort had left OSU.

Table 1: Fall Term	2002 Coho	ort Graduati	on, Rete	ntion, and A	ttrition F	Rates
Fall 2002 Cohort	2	2006		2007	2	2008

For students who graduated from OSU, a large proportion graduated from colleges other than the one in which they had initially enrolled in Fall Term 2002. Table 2 lists the numbers of students who graduated from their original colleges and from other colleges transferred to by year. By the end of Summer Term 2007, 60.8 percent of students

(1,822) in the cohort class had graduated; 59.4 percent of them (1,082) graduated from the same colleges in which they originally enrolled in Fall 2002 and 40.6 percent (740) graduated from other colleges. Students who stayed in the same college in which they had originally enrolled graduated sooner than those in the cohort who had changed colleges.

Table 2: Graduations	s in four,	five, and six	years											
Fall 2002 Cohort 2006 2007 2008														
Number Percentage Number Percentage Number Percentage														
Same college	654	66.4%	1,056	61.4%	1,085	58.3%								
From other colleges	331	33.6%	665	38.6%	776	41.7%								
Total graduation	985	100.0%	1,721	100.0%	1,861	100.0%								

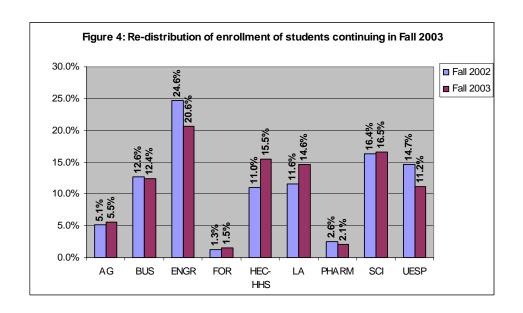

In the group of continuing students, some continued in the same college and some transferred to other colleges. Table 3 contains the net gains or losses of students by college for each year. The College of Engineering, College of Science, and the University Exploratory Studies Program consistently lost students to other colleges. The College of Forestry, the College of Health and Human Sciences (Home Economics and Education, College of Health & Human Performance), and the College of Liberal Arts gained students from other colleges each year.

\*The College of Home Economics and Education and Health & Human Performance were terminated in 2002. The College of Health and Human Sciences (HHS) and the College of Education were established in 2002. The numbers in 2002 - 2006 reflect the numbers gained by HHS.

Details on the re-distribution of continuing students are provided in Figures 4-9.

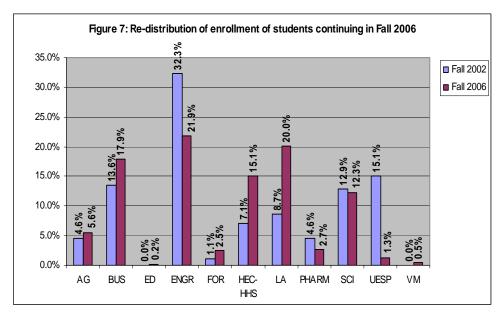

<sup>\*\*</sup>The Pharmacy numbers reflect the transition from a Pre-Pharmacy major housed in the College of Pharmacy to General Science major housed in the College of Science. The few students in the 2001 cohort mainly reflect this transition and are not reflection of the retention in the College of Pharmacy.

Source: Office of Academic Planning and Assessment (3/18/2010). Page 5 of 13

Tables 4-9 contain retention and graduation data for each college from Fall 2002 to Fall 2008 for the Fall 2002 cohort. The shaded columns in the top table on each page denote the college that students migrated to, listed by college. For example, in Table 4, 23 Agricultural Sciences students left OSU after their first year. Of those who stayed, 105 continued in Agricultural Sciences, 1 transferred to Engineering, 4 to Health and Human Sciences, 5 to Liberal Arts, and 9 to Science. Thus, Agricultural Sciences had 12.9% of their cohort migrate to other OSU colleges; 71.4% of the original cohort remained in Agricultural Sciences. The overall retention rate at OSU for this cohort of Agricultural Sciences students was 84.4%.

The second table on each page contains the net gain or loss by college for the freshman cohort. Again, for Agricultural Sciences, 2 students transferred in from Business, 5 from Engineering, 1 was gained from Forestry, 2 from Science, and 6 from UESP. At the same time, Agricultural Sciences lost 3 students to Health and Human Sciences and 3 to Liberal Arts. These changes resulted in a net gain of 10 students.

Over the course of this study, Liberal Arts consistently gained the most students from other colleges. Forestry and Health and Human Sciences (HEC and HHP) also consistently received students from other colleges. UESP consistently transferred more students to other colleges; this is expected given the purpose of UESP. With UESP omitted, the College of Engineering had the most students transfer to other OSU colleges over the course of the study.

The graduation results begin in Table 5, Fall 2002-Fall 2004. For example, after three years (Table 6), eight students from the Agricultural Sciences cohort graduated, making a three-year graduation rate of 5.4%. After four years (Table 7) the number increased to 65 students graduated for a 44.2% graduation rate; eleven of those students graduated from another OSU college and 54 graduated from Agricultural Sciences. For the fifth year (Table 8), 97 students in the Agricultural Sciences cohort had graduated; however, only 74 students graduated from Agricultural Sciences. The other 23 students graduated from other OSU colleges.

The sixth year (Table 9) graduation rate for Agricultural Sciences was 70.7% with a total of 79 students from the Agricultural Sciences cohort graduating in Agricultural Sciences

Source: Office of Academic Planning and Assessment (3/18/2010). Page  $6\ \mathrm{of}\ 13$ 

and 25 graduating from other OSU colleges. Overall, the fourth year graduation data (Table 7) suggests that of those students in the cohort who graduated in four years, about 33.6% were graduating from colleges other than the one in which they had originally enrolled. This number jumps to 38.6% after five years (Table 8) and increases again to 41.7% after six years (Table 9).

About 40% of the students who graduated from OSU after six years had transferred to an OSU college that was different from the college in which they had initially enrolled. The implications of this information in terms of advising and helping students to transition from college to college seem particularly appropriate.
