Migration Study on Fall Term 2003 Cohort

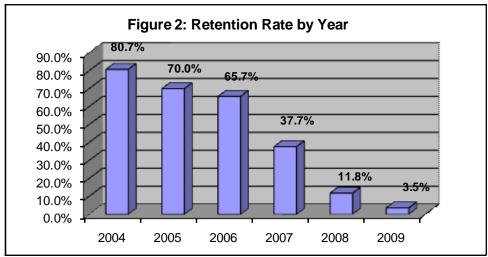

This is a migration study of the cohort of first time, full time (credit hours greater than or equal to 12) degree seeking undergraduate students enrolled in the Fall Term of 2003. The study provides detailed information on enrollment, graduation, retention, attrition, and migration of the cohort class over a 1-year to 6-year time span. With this study, each college can track the migration patterns of their students and determine the graduation, retention, and attrition rates of students in their college cohort from 2003-2009.

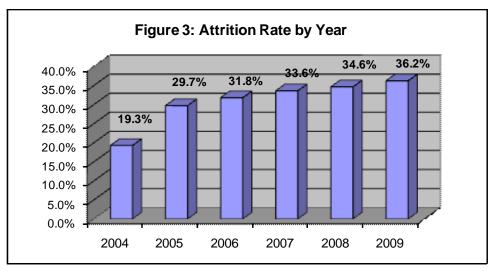

There were 2,988 students in the Fall Term 2003 cohort class, enrolled in colleges/programs at the university. Table 1 contains the student graduation, retention, and attrition numbers and percentages for 2007 (4-year), 2008 (5-year) and 2009 (6-year). The data show that in Fall Term 2009, there were 106 students from the cohort continuing their study at the university. Figures 1, 2, and 3 depict the graduation, retention, and attrition rates by year for the Fall Term 2003 cohort class. The six-year graduation rate for Fall Term 2003 cohort was 60.2%. The first year retention rate for the Fall Term 2003 cohort was 80.7%. One year later, 19.3% of the students in the cohort had left OSU.

| Table 1: Fall Term 20 | 03 Cohort G | raduation | , Retent | ion, and A | ttrition l | Rates |

For students who graduated from OSU, a large proportion graduated from colleges other than the one in which they had initially enrolled in Fall Term 2003. Table 2 lists the numbers of students who graduated from their original colleges and from other colleges Source: Office of Academic Planning and Assessment (3/18/2010). Page 2 of 13

they transferred to by year. By the end of Summer Term 2009, 60.2% of students (1,800) in the cohort class had graduated; 57.9% of them (1,042) graduated from the same college in which they originally enrolled in Fall 2003 and 42.1% (758) graduated from other colleges. Students who stayed in the same college in which they originally enrolled graduated sooner than those in the cohort who changed colleges.

In the group of continuing students, some continued in the same college and some transferred to other colleges. Table 3 contains the net gains and losses of students by college for each year. The College of Engineering and the University Exploratory Studies Program consistently lost students to other colleges. The Colleges of Business, Forestry, Health and Human Sciences (Home Economics and Education, College of Health & Human Performance), and Liberal Arts gained students from other colleges each year.

*The College of Home Economics and Education and Health & Human Performance were terminated in 2002. The College of Health and Human Sciences (HHS) and the College of Education were established in 2002. The numbers in 2004 - 2006 reflect the numbers gained by HHS.

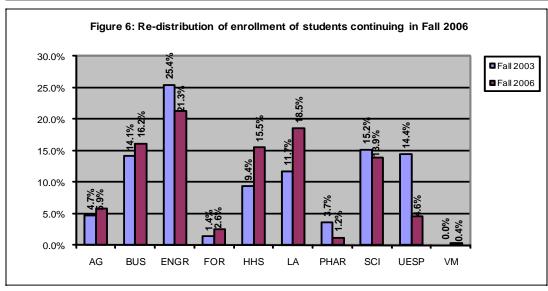

Source: Office of Academic Planning and Assessment (3/18/2010). Page 3 of 13

^{**}The Pharmacy numbers reflect the transition from a Pre-Pharmacy major housed in the College of Pharmacy to General Science major housed in the College of Science. The few students in the 2003 cohort mainly reflect this transition and are not a reflection of retention in the College of Pharmacy.

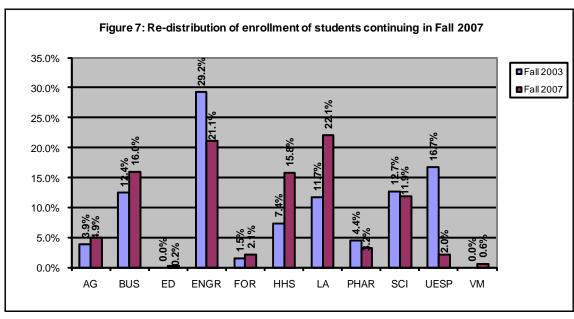

Details on the redistribution of continuing students are provided in Figures 4-9.

Tables 4-9 contain retention and graduation data for each college from Fall 2004 to Fall 2009 for the Fall 2003 cohort. The shaded columns in the top table on each page denote the college that students migrated to, listed by college. For example, in Table 4, 21 Agricultural Sciences students left OSU after their first year. Of those who stayed, 100 continued in Agricultural Sciences, 2 transferred to Business, 1 to Engineering, 4 to Health and Human Sciences, 4 to Liberal Arts, and 3 transferred to Science. Thus, Agricultural Sciences had 10.4% of their cohort migrate to other OSU colleges; 74.1% of the original cohort remained in Agricultural Sciences. The overall retention rate at OSU for this cohort of Agricultural Sciences students was 84.4%.

The second table on each page contains the net gain or loss by college for the freshman cohort. Again, for Agricultural Sciences, 2 students transferred in from Engineering, 2 was gained from Forestry, 4 from Science, and 6 from UESP. At the same time, Agricultural Sciences lost 1 student to Business, 4 students to Health and Human Sciences and 3 to Liberal Arts. These changes resulted in a net gain of 6 students.

Over the course of this study, Health and Human Sciences and Liberal Arts consistently gained the most students from other colleges. Forestry and Business also consistently received students from other colleges. UESP consistently transferred more students to other colleges; this is expected given the purpose of UESP. With UESP omitted, the College of Engineering had the most students transfer to other OSU colleges over the course of the study.

The graduation results begin in Table 5, Fall 2003-Fall 2005. For example, after three years (Table 6), seven students from the Agricultural Sciences cohort graduated, producing a three-year graduation rate of 5.2%. After four years (Table 7) the number increased to 58 students graduated for a 43.0% graduation rate; six of those students graduated from another OSU college and 52 graduated from Agricultural Sciences. For the fifth year (Table 8), 86 students in the Agricultural Sciences cohort had graduated; however, only 74 students graduated from Agricultural Sciences. The other 12 students graduated from other OSU colleges.

Source: Office of Academic Planning and Assessment (3/18/2010). Page 6 of 13

The sixth year (Table 9) graduation rate for Agricultural Sciences was 68.9% with a total of 77 students from the Agricultural Sciences cohort graduating in Agricultural Sciences and 16 graduating from other OSU colleges. Overall, the fourth year graduation data (Table 7) suggests that of those students in the cohort who graduated in four years, about 36.7% were graduating from colleges other than the one in which they had originally enrolled. This number jumps to 39.8% after five years (Table 8) and increases again to 42.1% after six years (Table 9).

About 40% of the students who graduated from OSU after six years had transferred to an OSU college that was different from the college in which they had initially enrolled. The implications of this information in terms of advising and helping students to transition from college to college seem particularly appropriate.
